## Description

**The Pendant Series** are single glowing Hanji paper pendants made in sizes from 8" to 22". They can hang as single elements, in groups, or in a row.

These signature shaped shades are crafted with hand-made Korean Hanji paper and laser cut, hand fabricated inner frames. Hanji is an extremely durable, high-quality material made from the inner bark of mulberry trees. We love how the surface has a subtle natural texture, and it affords an off-white brightness both on and off.

Hanji chandeliers can be made in any of our customizable configurations and can be increased and reduced in size both vertically and horizontally. Stems lengths are customizable.

We work closely with designers to explore what will work perfectly for their projects by utilizing 3D models, full scale mock-ups, studio visits, and finish samples. We will develop the design until it is exactly what the space needs. Minnie Grey and other watercolors, gold leaf, and nickel metal finishes are available. Costs vary.

## Materials

Bamboo  
Brass

## Dimensions

20"H x 18"L x 18"W  
(51 x 46 L x 46 cm)

## Weight

2 lbs (1 kg)
