

Description

Bamboo Diamond Sconce is a glowing diamond shaped light piece in customizable bamboo with a brass base. The Diamond Sconce can stand solo on a wall, be arranged in groups, mounted into geometric patterns, or paired with the larger **Diamond Illuminate**. It can be oriented in 360 degrees around a central mounting point.

The **Diamond Series** was designed to be a wall mounted abstract floating sculptural light. The piece appears solid when off, but when illuminated... it transforms into a glowing floating body.

The **Diamond Sconce** sits on a recessed diamond shaped brass box which also holds two G9 LED bulbs. The sculpted shape will appear animated from any point in the room and throws an aura of light around itself when illuminated.

The **Diamond Sconce** has many variations and can be fully customized.
